

Civilian Fingerprints- Background Checks

The Bay Village Police do not have the capability to conduct fingerprint checks through the State's WEBCHECK system. State law requires record checks on persons that are in certain professions or that work with children or the elderly. Therefore, if you are in need of a record check utilizing a fingerprint check, please contact a private contractor who specializes in providing these types of services. We are aware of a few that operate locally that you may contact for more information:
